Professional Summary

Ambitious MERN Stack backend developer with hands-on internship experience, passionate about building scalable web applications and committed to continuous learning. Proactive in developing expertise through real-world projects involving REST API design, PostgreSQL optimization, and workflow automation using n8n. Looking forward to applying problem-solving skills and technical creativity in a dynamic software development environment. Motivated to grow as a full-stack developer and contribute meaningfully to a forward-thinking engineering team.

Education

Master of Computer Applications (MCA) Anna University, Madurai	2024 – 2026
Bachelor of Computer Applications (BCA) Madurai Kamaraj University	2021 – 2024

Technical Skills

Frontend	React.js, Redux, Tailwind CSS, HTML5, CSS3, Bootstrap
Backend	Node.js, Express.js, JWT, Bcrypt, Middleware, Role-Based Access Control (RBAC)
Databases	PostgreSQL, MongoDB, MySQL
APIs	REST API design, GraphQL, API testing & documentation (Postman)
Tools	Git & GitHub, Docker, Postman
Automation	n8n Workflow Automation
AI/ML	AI API integration (OpenAI-compatible) in Node.js; NLP-based text analysis

Work Experience

Backend Developer Intern <i>Success Life Mantra, Madurai</i>	Jan 2026 – Jun 2026
- Designed and shipped 10+ REST API endpoints in Node.js/Express, consolidating 3 legacy data-fetch calls into 1 optimised route and reducing average response time by ~40%. - Migrated 4 core tables from unindexed MongoDB to PostgreSQL; added composite indexes cutting average query time from ~800ms to ~120ms. - Implemented JWT-based authentication with RBAC, securing user and admin routes with Bcrypt password hashing. - Built 3 n8n automation workflows (email follow-ups, status syncing, report generation), saving ~5 hours/week of manual effort. - Integrated AI APIs into Node.js backend services for prompt-based intelligent features; managed multi-turn conversation state. - Managed codebase using Git with feature branching; tested all endpoints via Postman before deployment.	
Python Intern Trainer <i>Apollo Computer Education, Srivilliputtur</i>	2022
Delivered hands-on Python training to 20+ students covering data structures, OOP, and file handling; assisted in debugging and created practical exercises.	

Projects

Career Insight System — <i>MERN Stack, Node.js, AI Integration</i>	
- Built an AI-powered resume analysis web app with skill gap detection, ATS scoring, and personalised career suggestions. - Engineered an NLP pipeline in Node.js using cosine similarity on TF-IDF vectors to surface missing keywords with confidence scores. - Integrated an external AI API to generate structured career advice across multi-step user interactions; implemented PDF parsing and React results dashboard.	
AgriConnect — Farmer-to-Consumer Platform — <i>MERN Stack</i>	
Developed a full-stack marketplace with order tracking (placed → confirmed → dispatched → delivered), real-time admin dashboard, and RBAC for Farmer, Consumer, and Admin roles.	
Hand Gesture Recognition — <i>Python, OpenCV, MediaPipe</i>	
Built real-time gesture-to-text system achieving ~92% classification accuracy across 10 gesture classes; designed to improve accessibility for hearing/speech-impaired users.	

Certifications & Achievements

- MERN Stack Development Certification — Codentra
- Intra Hackathon, Code Fest — Participant, 2022 & 2023
- IoT Hands-on Workshop — Sensor integration and microcontroller training (2023)
