PROFESSIONAL SUMMARY

I am an aspiring Flutter Developer and am building a strong foundation through academic work, projects, and continuous learning. My strengths include Node.js, Python, React.js, SQL, AWS, vs code, Communication. I have worked on Career insight. I also gained exposure through Backend Developer. I am looking for an opportunity where I can contribute effectively, continue learning, and grow in a Flutter Developer role.

PROJECTS

Career insight

6 month

MERN stack

This project aims to students and job seekers. The Career Insight System is an advanced AI-powered web application designed to support students and job seekers in strengthening their employment readiness. Using intelligent analytics and Natural Language Processing (NLP), the system extracts key information from resumes, analyzes employment/education timelines, detects career gaps, and evaluates candidate skills against industry requirements. The system not only highlights missing skills but also recommends suitable job roles, certifications, and personalized learning pathways to improve employability. A dynamic visualization dashboard provides Resume Score, Skill Readiness Index, Gap Analysis Report, and Career Suggestions. By integrating AI-driven resume evaluation, gap detection, and job suitability guidance into a single platform, this solution acts as a powerful career enhancement assistant in today's competitive job market.

Node.js

ACHIEVEMENTS

- Secured First Class with Distinction in Bachelor of Computer Applications (BCA).
- Ranked among the Top 10 students in the department during final year.
- Achieved high academic performance consistently across semesters.
